

## **Self-Contained Material Handler Safely Moves Loads Up to 2,500 lbs.**

**Seattle WA, USA — December 2011** — A new concept in material handling, the LoadRunner™ makes it safe for one operator to easily move loads up to 2,500 lbs. on air. The LoadRunner utilizes on-board compressed air to ‘float’ the load across the floor. This technology greatly reduces friction, requiring a mere fraction of the normal operator effort to move the load. The LoadRunner effectively assists or replaces traditional material handling equipment including hand trucks, pallet jacks and forklifts. Completely self-contained, the unit features a low profile deck design with a 2” insertion height and intuitive throttle-style fingertip controls. The patent pending LoadRunner is quiet and emission-free; ideally suited for manufacturing, cleanrooms, assembly, testing, and warehouse applications requiring redundant and recurring load movement.

Founded in 1967, AeroGo, Inc. is the world leader in providing innovative load moving solutions for highly sensitive and exceptionally heavy loads using air film technology. AeroGo products comply with ISO9001:2008 quality standards. For more information on air casters, contact 800-426-4757 or email [info@aerogo.com](mailto:info@aerogo.com) or visit [www.aerogo.com](http://www.aerogo.com).
